

# HEEZE MECHANICS BV

**Involved in space research since 1966**  
**ISO 9001 2000 certified**

The plasma torch shown here serves as an example of the activities of the company. The construction of such a torch, of which the chamber is capable of maintaining permanent temperatures of 10.000°C, includes:

- Machining and fabricating techniques
- A broad selection of materials
- A wide choice of surface coatings and heat treatments

HEEZE MECHANICS

You invent... ...what we make
