

NEDINSCO

Nedinsco develops, designs and builds sophisticated, optical, mechanical and electronic systems (including software) for high-tech applications.

Nedinsco is equipped to cover the entire product cycle from concept to series production.

Our development, design and integration skills comprise the following fields:

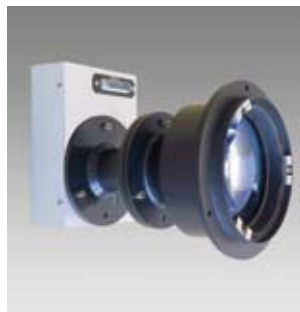

- Precision mechanics,
- Optics,
- Electronics,
- (Embedded) Software.

Nedinsco has a range of production facilities:

- CNC machining,
- Surface treatment,
- Assembly:
Optical / Mechanical Electrical /
Cleanroom,
- Qualification.

Our customers are mainly active in the following industries:

- Semiconductor,
- Defence,
- Medical,
- Optical.
