

NEM b.v.

NEM is a globally leading engineering company in the field of steam generating equipment. NEM's HRSGs are installed on hundreds of power plants worldwide.

Since the 1960s, the company supplies custom made solutions regarding Heat Recovery Steam Generators and Industrial and Utility Boilers for power generation and industrial applications throughout the world.

NEM's HRSGs take up the largest portion of the company's activities. The firm's driving forces are its distinctive know-how and continuous technological innovation, with an eye for new applications such as steam generation for enhanced oil recovery and solar power applications. NEM's head office is located in Leiden, the Netherlands.

Our product range can be divided as following:
Heat Recovery Steam Generators, Industrial and Utility Boilers, Waste-to-Energy Steam Generators, Enhanced Oil Recovery Once Through-HRSGs, Water/Steam Cycles for Concentrated Solar Power, Diverters and Dampers.
