

# The Blok Groep

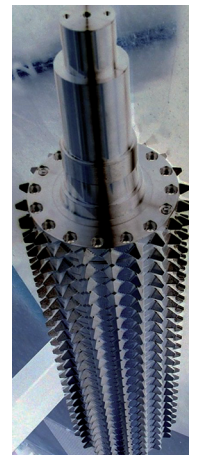

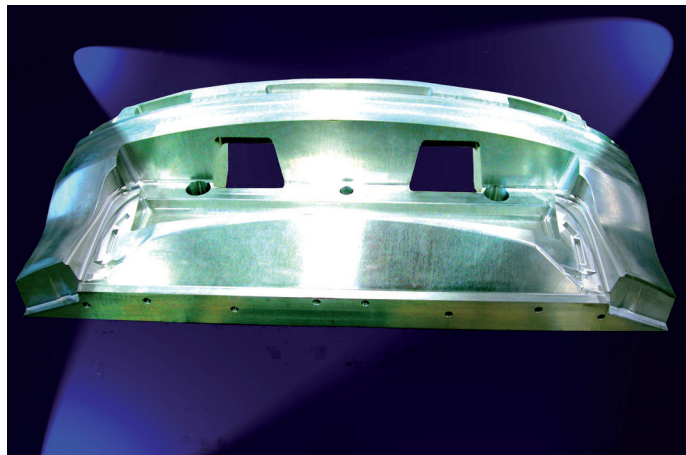

**The Blok Groep is a leading machining company. We are supplier and partner for high-quality, complex and technical solutions in the field of machining. A dynamic and versatile organisation that distinguishes itself through customer-oriented thinking and aims for long-standing partnerships with its customers. The Blok Groep consists of 2 divisions; Blok Mechanical Industry and Blok Industrial Services.**

The Blok Groep's headquarters are in Velsen-Noord and we have been operational for over 20 years as a leading machining manufacturer of high-quality precision parts. Other activities include hydraulic repairs and service works, besides machine and module assembly for renowned companies in several industries.

Blok Mechanical Industry B.V. manufactures products that can be applied e.g. in the aviation industry, the compressor industry, the packaging industry, the paper industry, the marine engine industry and the petrochemical industry. Customised and small to large serial production takes place in our excellently equipped workshops. We have an air-conditioned plant and measuring room.

A major part of the production is exported around the globe.

Blok Industrial Services B.V. is supplier for diverse of precision parts ranging from a few pieces to small series production and repairs. Your partner for very short-term assignments and quick deliveries, if required. Revolving parts sized up to 2000 mm diameter and 6000 mm long and a maximum weight of 25 tons are also possible. In addition, we perform hydraulic repairs a revision works.
