

# VDL Enabling Technologies Group

**VDL-ETG is part of the VDL Group. The VDL Group is an international industrial company, with approximately 75 subsidiaries, devoted to the development, production and sale of semi-finished and finished products. VDL Group is based mainly in the Netherlands and Belgium. VDL Group employs about 7500 people and the turnover is approximately 1,5 Billion Euro.**

VDL-ETG was formerly known as Philips Machinefabrieken. VDL-ETG is the 'world's largest high-end equipment foundry.' VDL-ETG operates in the business of contract manufacturing of mechatronic (sub) systems and modules for mainly OEMs in the high-tech capital equipment industry. As a system supplier, VDL- ETG covers the value chain from (co-) engineering through parts production to assembly and testing.

VDL-ETG does not have its own products. Instead, we make your products. On demand. On time. According to the very highest technical specifications, when required. Pre-tested and cost effectively.
